

# GARDENSTRAW™

## Applications

- ▶ Gardens
- ▶ Flower Beds
- ▶ Compost Bins
- ▶ Grass/Seeding Areas
- ▶ Residential/Commercial Projects

## Benefits

- ▶ 100% organic
- ▶ Reduces need for watering by up to 50%
- ▶ No tackifier added
  - Lower moisture levels mean lighter bales with less chance for mold/mildew during storage
  - No added chemicals promote better seed germination without affecting the critical soil pH balance
  - No clumping/sticking during installation
  - Easy to spread
- ▶ Manufactured using an Industry Leading Hammering Process
  - Exclusive process exposes the lignin in straw, which is a natural tackifier.
  - Hammered straw pieces in uniform lengths provide considerably more coverage than non-hammered straw.
  - One 20-pound bale of GardenStraw™ covers up to 50% more area than the competitor's 28-pound bale.
  - Straw fibers decompose from the bottom up after installation to promote better plant growth.
- ▶ Reduces risk of Tomato Blight and Potato Beetles
- ▶ Superior quality control makes GardenStraw virtually weed and seed free.
- ▶ Void of netting for easy maintenance & safe for wildlife
